UNICHROME PAC

Chrome-Aluminum complex and synthetic tanning agent

Typical Analysis

Appearance	: Light Green Powder
Active Substance	: 95%
pH (10% sol.)	: 3.5 ± 0.5
Ionic Character	: Cationic

Properties

UNICHROME PAC is a product which gives soft leather with very fine grain and excellent filling of flank and belly areas. It is also employed in the retannage where rich color is desired and improves levelness of color. Buffing of the grain and suede will be very fine and compact. **UNICHROME PAC** is recommended for all articles destined to be buffed such as suede, nubuck, double face, fur and all leathers.

Application

In the pickle or tanning float, 2-4% run 60 minutes before the addition of tanning agent. In the retannage from 4-6% on shaved weight depending on the article desired.
